Choose Wall + Led - Parchment
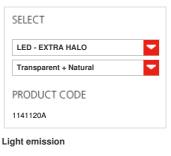

DESIGN BY:

Matteo Thun
2006

MATERIALS:

polycarbonate, parchment

DESCRIPTION:

The design of the transparent antistatic polycarbonate diffuser is embellished with vertical internal slits, which, as well as giving it greater aesthetic value, also allow a better light diffusion. The diffuser is covered by parchment paper. Due to the new L.E.D. technologies, this lamp meets ever greater demand to use discreet, precise light sources with low energy consumption and high light output. Excellent for reading, it is proposed with a polycarbonate shell with a finish coordinated with the metal structural parts of the other lamps of the series.

Two on/off switches on body lamp. LED included. White light LED in class 1M according to EN60825-1. Max. optical power: 96 μW @450-470nm. Do not look at it directly with optical instruments (lennses etc.) and from a distance lower than 20 cm.
