### Pipe Suspension LED 2700K

#### DESIGN BY:

Herzog & De Meuron  
2002

#### MATERIALS:

Polycarbonate, steel, silicon

#### DESCRIPTION:

Flexible painted steel structure, covered with a natural anti-yellowing silicone case; ceiling rose and diffuser in transparent rubber-effect painted polycarbonate; mirror aluminium reflector with random perforations; painted steel bottom plate. The new internal diffuser is reinterpreting the old fluorescent lamp using a modern LED source, this guarantees the same optical performance with less power consumption and a better quality of light.

Flexible and adjustable, Pipe has a micro-perforated reflector that improves the quality of the lighting in the environment, as well as it enriches the design of the luminaire, which looks like it is studded with points of light of varied dimensions.
